

My Dream Job

5B 5 Chan Yuet Hei, Argo

I want to be an astronaut because I want to have an adventure in space. I am good at understanding space station systems, as well as having detailed knowledge of the operational characteristics, mission requirement and objectives. I also know about the supporting systems for each piece of equipment.

I will work in a spaceship. I will venture into space to conduct scientific research, gather data and expand my understanding of the universe. I need to wear a spacesuit because it helps astronauts in many ways. The suit protects astronauts from getting too hot or too cold. It also gives astronauts oxygen to breathe while they are working in space.

I want to be an astronaut because I want to have an adventure in space.
