

My Dream Job

5E 20 Wong Chi Kit, Jack

I want to be an engineer when I grow up because I want to help people. I am good at math and building stuff. I will work in an engineering warehouse. I need to wear a hard hat and steel-toed boots when I work on construction sites. I need to study engineering at university to get my dream job. I also need to be very hard working and creative. I want to design and develop useful infrastructures for my friends and family.
